

HYGIEIA BIOLOGICAL LABORATORIES

WOODLAND, CALIFORNIA

COMPANY

NOVEL BIOTECHNOLOGY PRODUCTS

Established in 1991

Hygieia is in the business of **solving animal agriculture diseases** domestically and globally- never failing to do so. Hygieia is now the largest locally held biotechnology manufacturer in the Sacramento region and continues to grow rapidly.

PRODUCTS

VACCINES FOR AGRICULTURE

The reduction of pathogens in animals is an important element of human food safety. Hygieia's vaccines help to prevent pain, suffering and loss due to infectious diseases in:

- Dairy
- Cattle
- Sheep
- Poultry

Hygieia mixes the wisdom of experience with the delight of innovation and discovery to be a leader in vaccine innovation including "Firsts" against several diseases and the **world's first commercial vaccine against a venom.**

FUTURE

OUR HOME IN WOODLAND, CA

We continue to grow our business. Developing products for fish and exploring ways to apply our technologies to humans.

"Woodland sits at the crossroads of hard work and creativity. With a work force dedicated to these principles and a central location ideal for living and recreation, Woodland is the perfect place for our firm to thrive."
