

AMERICAN INTERNATIONAL MANUFACTURING

WOODLAND, CALIFORNIA

UNIQUELY QUALIFIED

American International Manufacturing Company (AIM) began with a simple “air leg,” now an industry standard, and grew to produce a variety of cutting-edge equipment with a personal touch

Established in Woodland in 1973

QUALITY AGRICULTURAL AND INDUSTRIAL EQUIPMENT

AIM is equipped to provide precision machining for one-of-a-kind projects or larger production quantities, specializing in food processing and walnuts, pistachios, and pecans in particular.

AIM equipment is used in the world's three largest walnut shelling plants

AIM is trusted by local processors like La Tourangelle, national companies like General Mills, and ships internationally to Chile, Australia, Egypt, Mexico, Turkey, and China

OUR HOME IN WOODLAND, CA

“[Woodland] really is an epicenter for food production and food processing (...) All the nut guys are here. We’re close to the Bay Area for steel and Sacramento for parts. If we were somewhere in the middle of Nevada you can’t do that”

Seth Bridges
Co-Owner, AIM

About 33 employees keep AIM humming. With enough demand to hire at least 4 more fabricators and additional support staff, AIM hopes to expand their footprint and add a prefabrication shop in the next 5-10 years
